

How to Turn on Your New Solar System - Fronius

Now that your meters have been changed over, it's time to turn on your new solar system.

Step 1:

Go to your switchboard and flip the **Main Switch Inverter Supply** into the **on** position.

The circuit breakers should be labelled with stickers like the ones above

Step 2:

Turn on your DC Switch (this is located next to your Inverter). It will look like the picture above.

To turn on DC, turn black switch to the **ON** position.

PLEASE NOTE:
Some Inverters do not have Step 2 please go to Step 3 if no DC Isolator

Step 3:

Turn your DC Switch on – this is located on the bottom of your Fronius Inverter. The switch will feel like a dial and you need to make sure that it is in the “on” position. **(A quick tip is to make sure the dial is facing toward you)**

To do so, please follow these three easy steps:

If you are still having trouble, or have any other questions or concerns, please don't hesitate to contact the office on 6234 7009.

Please note that after switching everything on, the inverter will go through a set up procedure and will take a few minutes before starting to work.
